Iconic Off-Road Rules

There are five Iconic 2WD classes and five Iconic 4WD classes. The Truck class is being rested for Revival 2024.

2WD: 1976-1982 1982-1984 1984-1988 1989-1993 1994-1998 ~~2WD T 1989-1998 (Trucks)~~

4WD: 1983-1985 1986-1987 1987-1988 1989-1993 1994-2004

We recommend keeping your buggy standard to what was seen racing back in the day. If you're concerned about your buggy's eligibility, contact the Scrutineering Committee by email to: iconicoffroad@outlook.com **well before the event** and the team will assess it. Assessors will first consider whether this was **commonly seen racing** back during the year span of the class. Rule adjustments since 2023 have been **highlighted**.

1. **10.5 Brushless Motor limit. No Brushed Motor limit.**
2. Shocks, slippers, wheels and tyres are open.
3. Dogbone, UJ and CVD driveshafts are open except for the latest CVDs that mount within the hub.
4. **Bodies** must have been available during the year span of the entered class **and Wings should be representative of the era.**
5. There is a 2s LiPo battery limit and they must be in a hard case. Battery weight/size must be to the battery manufacturer's specification.
6. The maximum permitted buggy width is 250mm. There will be a box that the buggies will need to fit into.
7. Additional permitted weight is a maximum of 50g and must be commercially available stick-on 'wheel' weights only.

8. Motor, transmission orientation, servo and battery should remain in the kit position. If this is not possible with modern electrics it should be as close to kit as possible. If there are any issues, please contact the Scrutineering Committee before event.
9. Modifications and customisations must be minimal. Any customisation and materials must match those commonly seen racing during the years of that buggy's class. 'Homemade' and 3D printed parts must match the original item's geometry but can be strengthened in areas for reliability or upgraded with aluminium parts used back in the era. **Alloy parts must replicate the original part in all aspects or be approved by the Scrutineering Committee online before the event.**

10. We don't expect entrants to run newer parts (for example: arms) on an older buggy. If a buggy does have newer vintage parts then it should be entered into a later class. We do not want to see modern parts on vintage buggies.

11. Re-released buggies from Tamiya, Team Associated, Kyosho and Schumacher are eligible in their original release category. Hop-ups for those buggies from their manufacturer are also eligible. Please note that the Tamiya DT-02 Holiday Buggy 2010 and Sand Rover 2011 are not eligible because they have a modern chassis base.

12. **Spirit of the sport within its era.** This allows period modifications and keeps vintage racing as vintage racing. Anything exploiting a grey area will be reviewed by the Scrutineering Committee. If you're unsure that your car fits the rules, you can email pictures to the committee for approval to iconicoffroad@outlook.com

There will be a group of Scrutineers at Revival 2024. After every heat and final, buggies must be left at scrutineering before going out to marshal. If a buggy is ineligible, we will do our best to help the entrant make it eligible. If we cannot make the buggy eligible then its time will not be recorded. Please consider this when preparing your entry because the best solution all round is to keep it standard to what you'd have seen racing back in the original year.

Eligible Buggies

The following buggy lists are to guide participants when entering the Revival. The lists aren't exhaustive so if you don't see a buggy you'd like to run or have a general query, please contact iconicoffroad@outlook.com. There are also links to three Thomas Peter Old School Euro Masters documents to help guide Digger, Hotshot and MIP racers. A huge thank you to Robert Jaques, Terry Cresswell and Mike Haswell for helping me compile the lists. John.
